

Solar Pro Roofing is named a 2024 Top Solar Contractor

Northport, NY, 11768 — With the United States receiving significant federal support of solar and storage in the Inflation Reduction Act, excitement for the technologies is growing at a record pace. Solar developers, installers and contractors are capitalizing on the moment by building more substantial projects across the country. Solar Pro Roofing was recognized for its increased effort to expand the U.S. market by taking a top spot on the 2023 Top Solar Contractors List, released today by Solar Power World.

The Top Solar Contractors List is developed each year by industry magazine Solar Power World to honor the work of solar installers in the United States. Solar firms in the utility, commercial and residential markets are ranked by the number of kilowatts they installed in the previous year. Companies are grouped and listed by specific services, markets and states. Solar Pro Roofing is ranked at No 41 in the State and 351 in the country.

“Renewable energy accounts for a quarter of U.S. electrical generation, now far exceeding electricity produced by burning coal,” said Kelsey Misbrener, managing editor of Solar Power World. “Solar power is an important member of that renewable makeup, and companies on the Top Solar Contractors List are all contributing to our country’s shift to cleaner electricity. We are honored to recognize them each year for their necessary work putting green kilowatts on roofs, over parking lots, in desert locations and across water reservoirs. Every project is making a difference.”

The United States reported its strongest first-quarter ever in Q1 2023 for solar panels installed, and industry analysts expect the solar market to triple in size over the next five years. The industry will stay busy, and companies on the Top Solar Contractors List will be the ones with their boots on the ground — or roof. Solar Pro Roofing is expected to grow exponentially this year and take a prominent position as one of the most well received local solar companies on

Long Island and NYC already possessing more accolades and 5 star reviews than 86% of their competitors within just a few years.

Solar Pro Roofing employs 7 workers who installed just under 1 Megawatt of solar power in 2022. Since its founding in 2021, the company has installed over 3 Megawatts of solar. The company whose creed is “Solar Should NEVER Be Shady” was published in Solar Power World Magazine for helping homeowners during the pandemic, now sponsors the Long Island Ducks, has been featured in Times Square, and has over 100 all 5 star reviews on google without a single less than 5 star review.

Jarret Sherrard (Company owner) says “It's unfortunate that the reason we get so many clients is because our niche is being honest, transparent, and integrity driven but I think we're setting a precedent for the other companies to follow. The only way they will be successful is to do the same. We are purifying the industry one client at a time.”

About Solar Power World

Solar Power World is the leading online and print resource for news and information regarding solar installation, development and technology. Since 2011, SPW has helped U.S. solar contractors — including installers, developers and EPCs in all markets — grow they're businesses and do their jobs better.
